

# OBS & StreamLabs Guide For PowerPoint With Video

Dear friends, in the [previous guide](#), you would have learnt how to put multiple videos together for your church service. In this guide, I will show you how to put a PowerPoint presentation together with a video recording of yourself. **Please zoom in to see the screenshots.**

- 1 Launch OBS Streamlabs
- 2 Add a scene and give it a name (e.g. PPT + Video)
- 3 Under sources, add the video recording of yourself. Crop your video accordingly (press the ALT key and drag edges in) so that you are presenting yourself in a 'portrait' mode.
- 4 Next, open a PowerPoint file, select 'Presenter View' under slideshow options, and enter presentation mode. On your keyboard, press ALT + TAB to switch back to the OBS app.
- 5 Within the same scene, add a new source and select 'Window Capture'.
- 6 Another window will pop up. Click on the drop down options for 'Window' and select the option that says 'PowerPoint Slide Show'.
- 7 Click done to insert the PowerPoint into the same frame as your video.
- 8 Adjust the size of your PowerPoint according to match the height of your video.
- 9 Click on the Mixer settings and select monitor and output to have sound. You are now ready to record.

# OBS & StreamLabs Guide For PowerPoint With Video

Dear friends, in the [previous guide](#), you would have learnt how to put multiple videos together for your church service. In this guide, I will show you how to put a PowerPoint presentation together with a video recording of yourself. **Please zoom in to see the screenshots.**

- 10 Select 'RESET VIDEO' so that you start with a blank screen. Click on 'REC' at the bottom right of the screen to begin recording. The timer should start. Click on the 'PPT + Video' scene to begin your video.
- 11 On your keyboard, press ALT + TAB to return to your PowerPoint presentation. Control your PowerPoint slide show from here. The slide show on the OBS Streamlabs app will progress accordingly.
  - \* If you have a secondary monitor, your Presenter mode slide show will be on the secondary monitor, and you will be able to see your slide show progress as your click.
- 12 Once your video + presentation is over, click on the 'REC' button again to end the recording. Go to your videos folder to find the recording.
- 13 Launch OBS (Open Broadcaster Software) app.
- 14 Follow the initial steps of the Streamlabs setup.
- 15 When it comes to adding source, select 'Window Capture', followed by PowerPoint slide show. You will need to make sure that the 'Multi-adapter Compatibility' box is checked in order for the PowerPoint slide show to be displayed properly.
- 16 Click 'OK' and resize your PowerPoint display accordingly.
- 17 After this, click on 'RESET VIDEO', followed by 'START RECORDING'.

The rest is the same as the Streamlabs guide.
